2008 RECOMMENDATION

The President recommends that the Committee on Grounds and Buildings recommend to the Regents that, following service of appropriate notice:

* * *

B. Following Temporary Amendment of the Standing Orders and Regental Policy, if approved, Approval of Proposed Guidelines for Implementation of the Pilot Phase of the “Process Redesign for Capital Improvement Projects”:

Approval of the following guidelines for campus participation in the “Process Redesign for Capital Improvement Projects” to provide a set of linked design and capital financial documents enabling the Regents to provide portfolio-level oversight of capital projects effectively. The Implementation Team anticipates that additional guidelines for implementation may be identified as it continues its work; when these are developed, they will be shared with the Committee on Grounds and Buildings for its information at a future meeting.

(1) Each campus’ Ten-Year Capital Financial Plan will be a stand-alone portfolio document not requiring additional commentary or explanation and will describe a financially feasible capital program, how it relates to academic and strategic priorities, and the financing strategies that will be used to implement the Plan. Each campus Ten-Year Capital Financial Plan will be reviewed and approved by the Regents.

(2) Chancellors will have authority to change the scheduling of individual projects identified within the Ten-Year Capital Financial Plan and to augment the budget of a project included in the pilot phase insofar as the project and the overall portfolio of projects remain financially feasible and the total project budget does not exceed $60 million.

(3) Chancellors will report annually to the President any changes or updates to their Ten-Year Capital Financial Plans. These data will be included in a University-wide annual report to the Regents.

(4) Each campus’ Physical Design Framework will be reviewed and approved by the Regents in coordination with the campus Long Range Development Plan (LRDP) and will be a comprehensive report identifying the campus’ principles and objectives for the design of the physical environment, how they relate to the campus LRDP, and how they are integrated into project planning and design. For the pilot phase, the Physical Design Framework should be approved with the campus’ Ten-Year Capital Financial Plan. Minor amendments to the Physical Design Framework may be approved by the President, based on guidelines to be developed. When these
guidelines are refined, they will be shared with the Committee on Grounds and Buildings for its information at a future meeting.

(5) The Regents will approve a template for a “checklist” to be used for project evaluation and documentation.

(6) For State-funded projects, the pilot phase of the redesign process will be limited to CEQA approval and design review. Campuses must continue to follow all procedures established by the State relating to the approval of project scope, budget and schedule. See Attachment B. (“Proposed Guidelines for Implementation of the Pilot Phase of the Process Redesign for Capital Improvement Projects.”)
PROGRAM PARAMETERS FOR THE PILOT PHASE OF THE DELEGATED PROCESS FOR CAPITAL IMPROVEMENT PROJECTS

The following Program Parameters for the Pilot Phase of the Delegated Process for Capital Improvement Projects outlines a set of integrated campus plans and reporting enabling the Regents to provide effective portfolio-level oversight of capital projects. Additional guidelines for implementation and monitoring of the Delegated Process may be identified; when these are developed, they will be shared with the Committee on Grounds and Buildings for its information at a future meeting.

For State-funded projects, the Delegated Process will continue to be limited to design review and any California Environmental Quality Act determinations. Campuses must continue to follow all procedures established by the State relating to the review and approval of project scope, budget, and schedule.

**Capital Financial Plan**

(1) Each campus entity requesting to have projects approved via the Delegated Process will be required to submit a Ten-Year Capital Financial Plan. The Plan is a stand-alone portfolio document not requiring additional commentary or explanation and will describe a financially feasible capital program, how it relates to academic and strategic priorities, and the financing strategies that will be used to implement the Plan. The Plan is reviewed by the President of the University and accepted by the Regents.

(2) Chancellors will report annually to the President or designee any changes or updates to the campus’ Ten-Year Capital Financial Plan. These updates will be consolidated in the University’s Ten-Year Capital Financial Plan and presented to the Regents for acceptance annually.

**Physical Design Framework**

(3) Each campus prepares a Physical Design Framework that describes the campus’ principles and objectives for the design of the physical environment, how these relate to the campus Long Range Development Plan, and how they are integrated into project planning and design, including descriptions of campus planning and design approval processes for capital projects. A Physical Design Framework comes into effect upon the acceptance of the Regents. A Physical Design Framework must be consistent with the Long Range Development Plan, and capital projects must be consistent with the Physical Design Framework. A campus may, if it elects, have separate Physical Design Frameworks for locations that are physically separated, and that may have separate Long Range Development Plans.

**Project Checklist**

(4) The Delegated-Authority Project: Certification Checklist provides the chancellor with a mechanism to attest that a project is consistent with the applicable campus plans and
otherwise meets the criteria for the Delegated Process; and the project adheres to all applicable laws, regulations, and University and Regents policies.

(5) Anticipating that the form of the Checklist will undergo modifications and refinement, the President of the University shall continue to have the authority to develop, and revise, as necessary, the project checklist.

Reporting

(6) The *Annual Report on Major Capital Projects Implementation* will provide the Regents with information, generally quantitative, which evaluates the implementation of goals for the capital program established by the Regents. By documenting the campuses’ response to both Regents and systemwide priorities, the annual report will enable accountability to the Regents and the President of the University. This report will include a section with detailed reporting on projects implemented with the Delegated Process.
