NON-STATE SUPPORTABLE Capital Costs	\$ 601.79	\$	649.93	Developer	\$	304.80	Developer	\$	304.80	Availability Payment - Capital	\$	18.03
				Campus Debt	\$	200.00	Campus Debt	\$	200.00	Campus Debt Service	\$	11.01
				Campus Funds ⁶	\$	145.13			n/a	Campus Owner Costs ⁷	\$	6.49
Operation & Maintenance	 			Campus Funds		n/a			n/a	Availability Payment - O&M	\$	7.40
(Annual Costs)										O&M	\$	7.74
Subtotal	\$ 601.79	\$	649.93		\$	649.93		\$	504.80		\$	50.67
TOTAL	\$ 1,239.33	\$	1,338.48		\$	1,338.48		\$	1,190.35		\$	103.31

Footnotes

UC financing - tax-exempt GRB - modeling rate: 4.25%, 40 years

UC financing - tax-exempt LPRB - modeling rate: 4.50%, 40 years

UC financing - Century Bonds: 4.858%, 40 years

¹Represents a total inflation increase of approximately 8%.

² A portion of the Developer funding will be an equity contribution of 10%.

³ Represents the maximum annualized cost for the first full year of operations.

⁴ The Annualized costs are not constant each year. The Operation & Maintenance annualized costs are projected for year of substantial completion. Operations & Maintenance costs will escalate thereafter to increase with inflation. Availability Payment - Capital will increase at 1%/year.

⁵ The DBFOM cashflow model that generates the annualized costs shown here utilizes the financing assumptions below. These are market rates, and differ from the planning rates used in the Summary of Financial Feasibility Attachment.

⁶ Includes owner contingency, owner costs (AV equipment, TIs, Faculty Start-up costs, etc.), and IDC.

⁷ Campus owner costs and IDC are modeled to be paid from campus cash sources and not financed. Contingency is modeled to be paid by campus funds. Costs are shown in an annualized format for the purposes of comparison to a model assuming a Design-Build approach with 100% financing.
