PLANNING FOR A

University of California School of Global Health

September 17, 2008

Planning for a UC School of Global Health

• Context "Global Health and California in the 21st Century"

~Professor Sir Richard Feachem

• Planning Process

"University of California School of Global Health"

~Haile T. Debas, M.D.

Global Health and California in the 21st Century

Professor Sir Richard Feachem Director, Global Health Group

Global Health

The health of all of humankind and

the global and local factors and trends which improve or worsen it

Global Health Challenges and Opportunities Never Greater

1. Challenges

- Disparities
- Pandemics
- Health Systems

2. Opportunities

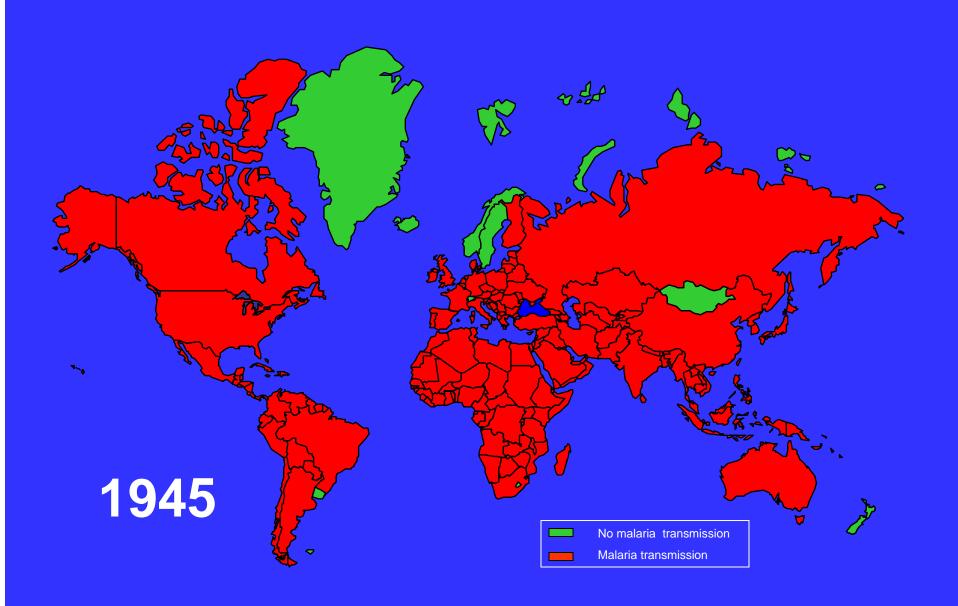

- Political commitment
- Money on the table
- Accelerating science
- The vision and commitment of young people

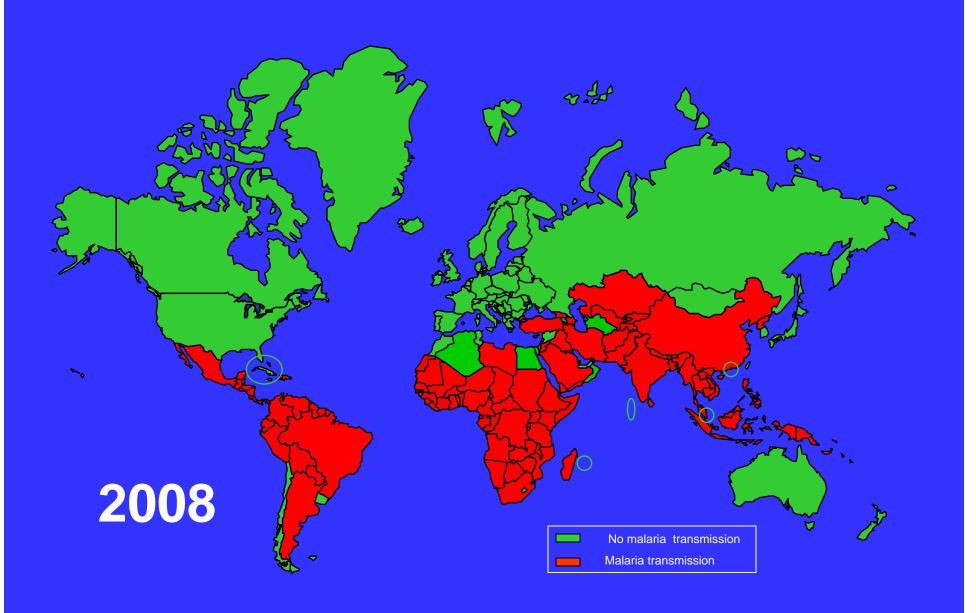

Global Health = Local Health The World and California

- 1. Once bitten ...
- 2. Sex, Drugs, Sneezes, and Chickens
 - HIV/AIDS
 - MDR/XDR TB
 - H5N1
- 3. California can seriously damage your health
- 4. A big sucking sound

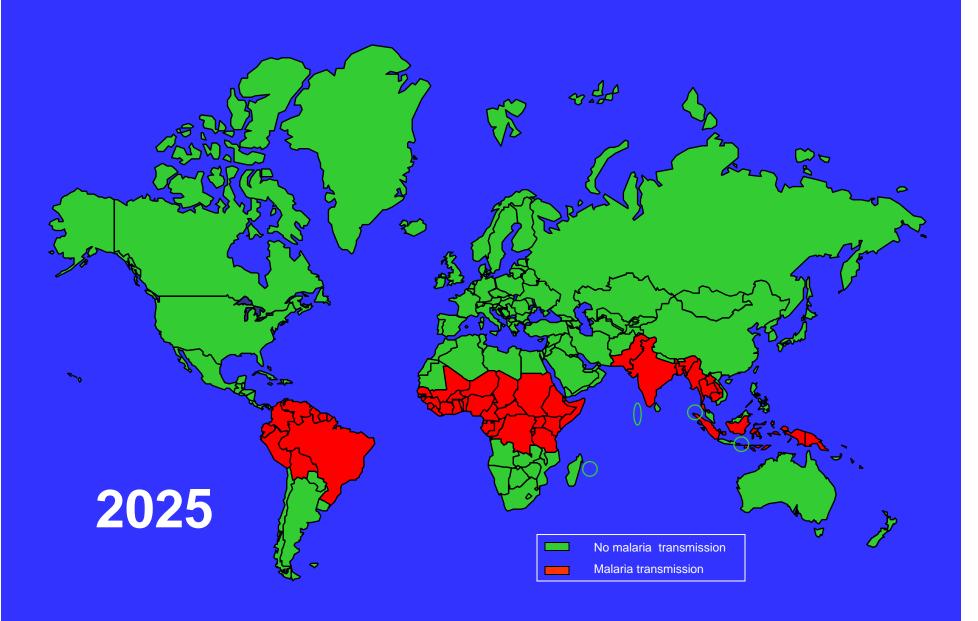

The Boundaries of Malaria Transmission By Country

The Boundaries of Malaria Transmission By Country

The Boundaries of Malaria Transmission By Country

Female *Anopheles freeborni* mosquito having a blood meal

Malaria in the USA and California

- Every year about 1,500 cases in the USA, of which 15% in California
- Between 1957 and 2003: 63 outbreaks of malaria in the USA, of which 27% in California
- Largest outbreak recorded, Carlsbad, San Diego County, June-September, 1986, 28 cases

First Cases by Country and Date

- 1997: Hong Kong
- 2003: China
- 2004: Vietnam and Thailand
- 2005: Cambodia and Indonesia
- 2006: Turkey, Iraq, Azerbaijan, Egypt, and Djibouti
- 2007: Nigeria, Laos, Myanmar, and Pakistan
- 2008: Bangladesh
- 20XX: California?

By June 19, 2008

385 known human cases of whom 243 (63%) died in 16 countries Two thirds of reported cases and deaths are in Indonesia and Vietnam

The Risks of Moving to California

For Mexicans, moving to California

- Risks of maternal morbidity increase
- Likelihood and duration of breastfeeding decrease
- Risks of gastric cancer if working in the citrus fruit industry increase
- Risks of HIV infection increase

The Global Health Workforce

- Foreign born and trained (FBT) nurses comprise roughly 15% of nurse workforce in California today
- Almost twice the next highest state Florida
- One-third of newly licensed nurses in California today are FBT
- For the US, most FBT nurses come from the Philippines, Canada, United Kingdom, and Nigeria (82% of total)
- FBT physicians comprise 22% of Californian workforce

Planning for a UC School of Global Health

- 2005: UC Long-term Guidance Committee
- 2006: All-Campuses Exploratory Meeting
- 2007: 18-month UCOP Planning Grant
- 2007-2008: Phase I Planning
- 2008-2010: Phase II Planning

Planning Committees

- All-Campuses Planning Committee (ACPC)
- Senior Advisory Committee (SAC)
- External Scientific Advisory Board (ESAB)

All-Campuses Planning Committee

- Faculty from all 10 Campuses
- Academic Senate
- Students
- 27 Areas of Expertise represented

Senior Advisory Committee

 Campuses Represented 	10
• Chancellors/Vice Chancellors	6
• Deans	15
 Associate Deans/Directors 	4
 Academic Senate 	1
• UCOP	1
• Disciplines Represented	16

External Scientific Advisory Board

- Jo-Ivey Boufford, President, New York Academy of Medicine
- Harvey Fineberg, President, Institute of Medicine, National Academy of Sciences (*Chair*)
- David Gollaher, President & CEO, California Healthcare Institute
- Wyatt R. Hume, Former Provost and Executive Vice-President, University of California
- Jeffrey Koplan, Vice President, Woodruff Health Science Center, Emory University
- John Martin, President & CEO, Gilead Sciences
- Joy Phumaphi, Vice President for Human Development, World Bank
- Jaime Sepulveda, Director of Integrated Health Solutions Development, The Bill and Melinda Gates Foundation

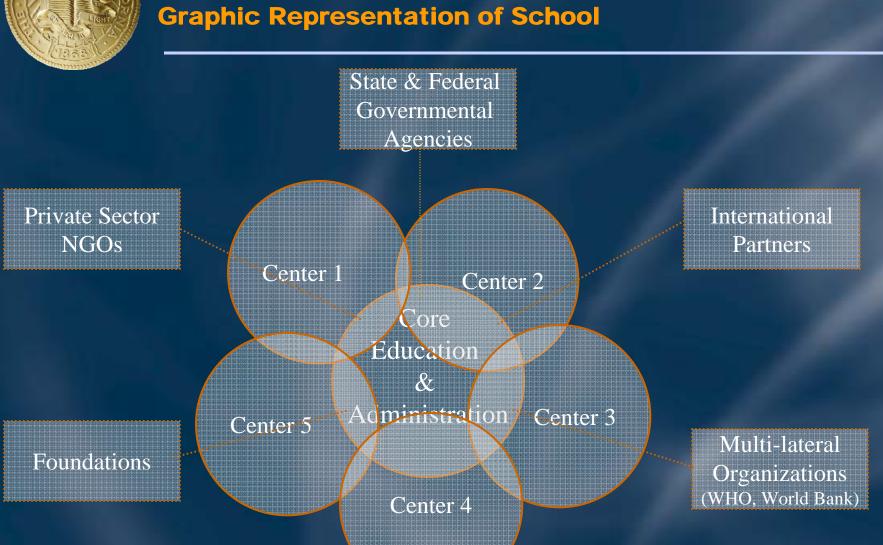

Vision for UC School of Global Health

- Problem-based: not discipline-based
- Interdisciplinary: both health and non-health sciences
- Multi-campus
- Action-oriented: implementing projects and policies
- Value-adding: not replicating existing schools

Structure

Education and Training

- Initially only graduate programs
- Education will occur at both Administrative Core and the Centers
- Degrees: Masters and PhDs
- Degrees to be awarded jointly between School and Campus

Research Agenda Workshop Themes (1)

UCB: Global Health Delivery Systems

UCD: Agro-Eco Systems and Human Health

UCI: Pandemics and Emerging Infectious Diseases

UCLA: Climate Change and Health

UCM: Pandemics, Security, and Private Rights

UCR: Water- and Vector-Borne Diseases around

the World: The Role of Technology,

Economics, Culture and Communications in

Prevention and Treatment

Research Agenda Workshop Themes (2)

UCSB: Ecology and Health

UCSC: Information Technology and Infectious

Diseases

Natural Products for Treatment of Neglected

Diseases (with UCSF)

UCSD: Pandemic Infectious Diseases Migration,

Mobility, and Health

UCSF: Global Women's Health and Disparities

Responding to Global Challenges of HIV, TB,

and Malaria

Phase II Planning (2008 - 2010)

- Finalize details of governance
- Fully develop educational program
- Competitive selection of Centers through a 3step process (workshops, LOI, full proposals)
- Develop detailed resource plan
- Implement a fund-raising strategy: Private-Public Partnership
- Prepare final School proposal to be reviewed by Academic Senate
- Seek Regental approval in 2010
