DISCUSSION ITEM

For Meeting of September 18, 2014

UC HEALTH UPDATE: INCREASED STUDENT ACCESS TO MENTAL HEALTH SERVICES

Student demand for mental health services exceeds the resources available on campus. In order to support the safety, well-being, and academic success of students enrolled at UC, campuses require additional resources to provide direct mental healthcare services. The Senior Vice President of Health Sciences and Services, in partnership with the Vice President of Student Affairs, will present evidence to demonstrate this need, and will discuss options to address the problem.
